

3.6.5 Trails

The Riverside County Regional Park and Open Space District officially recognizes only portions of the Santa Ana River trail as an existing off-road trail. Other off-road trails that are in use are not publicly owned or maintained. The Santa Ana River Trail is outside the HCLE Corridor study area.

There are four trails classifications in the proposed Riverside County General Plan Circulation Element: Class I Bike Paths, which are off-road, paved paths; Class I Bike Paths/Regional Trails (Combination Trails), which includes both paved and unpaved areas to accommodate bicycle, equestrian, and pedestrian usage in a single facility; Class II Bike Lanes, which are on-road, signed and striped bicycle lanes; and Class III Bike Routes, which are on-road, signed bicycle routes with no separate lanes. If a bikeway is primarily for transportation, it is not considered a recreational resource. Also, recreational bikeways that occupy highway right-of-way are not considered a recreation resource (FHWA Section 4(f) Policy Paper).

Table 3.6.D identifies the trails and summarizes the linear feet of planned off-road trail that transects or coincides with portions of the HCLE Corridor alternatives. Uses of these trail may include hiking, off-road biking, and equestrian use. Existing trails are shown in Figure 3.6.2.

Table 3.6.D - Existing Trails (Linear Feet Within Alternative Bandwidth)
