

Disruptions to communities or neighborhoods that are divided or isolated by any future HCLE Corridor;

Permanent losses of biological resources, including wildlife, vegetation, and wetlands;

Disturbances to unknown or unrecoverable archaeological or cultural resources; and

Disturbances to water resources, including surface water, floodplains.

Long-Term Benefits of the HCLE Corridor may include:

An improved transportation network in western Riverside County, with gains in efficiency and economy of travel, and reduced congestion on local streets and highways;

Infrastructure support for approved development projects; and

Economic gains by importing public investment for designing and constructing the HCLE Corridor to the region, to the extent local companies and employees are involved.

7.3.2 No Build Alternative

The No Build Alternative would not result in the costs or benefits described above.
