

### **1.4.1 U.S. Fish and Wildlife Service**

The USFWS would be responsible for issuing or denying an incidental take permit for those species listed on the Covered Species List (Section 2.0, Table 2B). Pursuant to FESA, the USFWS may issue a permit authorizing take incidental to an otherwise lawful activity, conditioned on implementation of the applicant's habitat conservation plan together with other measures specified by the USFWS. The USFWS would also be responsible for issuing a Record of Decision (ROD) through the NEPA process, and for executing the IA.

### **1.4.2 California Agencies**

The CDFG would be responsible for approving the proposed NCCP and IA. These actions are necessary for the CDFG to issue a CFGC Section 2835 take authorization under the NCCP as described in Section 1.1.4.

Caltrans and California Parks and Recreation would be responsible for executing the IA and considering the EIR/EIS.

### **1.4.3 County of Riverside Agencies**

The County of Riverside would be responsible for certifying the EIR component of the joint EIR/EIS document, executing the IA, and adopting the MSHCP.

Flood Control, RCTC, County Parks, and Waste Management would be responsible for executing the IA and considering the EIR/EIS.

### **1.4.4 Local Jurisdictions**

All jurisdictions and agencies participating in the proposed MSHCP must adopt the MSHCP, IA, and implementation mechanism. To implement the proposed MSHCP, local jurisdictions would rely on their land use authority provided through their General Plans and zoning ordinances.
