

County of Riverside General Plan - Hearing Draft

Harvest Valley/Winchester Area Plan

It is important to note that the data in this area plan is current as of June 19, 2001. Any General Plan amendments approved subsequent to that date are not reflected in this area plan and must be supported by their own environmental documentation. A process for incorporating any applicable portion of these amendments into this area plan is part of the General Plan Implementation Program.

Unincorporated land is all land within the County that is not within an incorporated city or an Indian Nation. Generally, it is subject to policy direction and under the land use authority of the Board of Supervisors.

A Special Note on Implementing the Vision

The preface to this area plan is a summary version of the Riverside County Vision. That summary is, in turn, simply an overview of a much more extensive and detailed Vision of Riverside County two decades or more into the future. This area plan, as part of the Riverside County General Plan, is one of the major devices for making the Vision a reality.

No two area plans are the same. Each represents a unique portion of the incredibly diverse place known as Riverside County. While many share certain common features, each of the plans reflect the special characteristics that define its area's unique identity. These features include not only physical qualities, but also the particular boundaries used to define them, the stage of development they have reached, the dynamics of change expected to affect them, and the numerous decisions that shape development and conservation in each locale. That is why the Vision cannot and should not be reflected uniformly.

Policies at the General Plan and Area Plan levels implement the Riverside County Vision in a range of subject areas as diverse as the scope of the Vision itself. The land use pattern contained in this area plan is a further expression of the Vision as it is shaped to fit the terrain and the conditions in the Harvest Valley/Winchester planning area.

To illustrate how the Vision has shaped this area plan, the following highlights reflect certain strategies that link the Vision to the land. This is not a comprehensive enumeration; rather, it emphasizes a few of the most powerful and physically tangible examples.

Community Centers. This method of concentrating development to achieve community focal points, stimulate a mix of activities, promote economic development, achieve more efficient use of land, create a transit friendly and walkable environment, and offer a broader mix of housing choices is a major device for implementing the Vision. Four community centers are planned in the Harvest Valley/Winchester planning area. A significant Community Center designation is located in Winchester to take advantage of rail service and proximity to the Diamond Valley Recreation Area. The theme envisioned for this transit-oriented Village Center has a western influence, capitalizing on the unique identity for the Winchester area. An Entertainment Center near the Diamond Valley Lake will serve tourists and take advantage of the regional recreational draw that the lake presents. Another Community Center Overlay south of Salt Creek creates a central focus for the surrounding residential community created by the confluence of three adopted specific plans.

Diamond Valley Recreation Area. Conservation land is just one of the many amenities offered by the Diamond Valley Recreation Area. The open lake and

surrounding land serve regional tourist, recreation, and camping activities. The presence and success of these activities also bolsters the local economy. This winning combination of an economic stimulator and regional attraction also serves as an impetus for future growth in the immediate area.

Preserved Open Space Character. The vast amount of conserved open space surrounding the Diamond Valley Lake and Double Butte Recreation Area help maintain the natural character of the area and act as major regional and recreational attractions for Riverside County. These lands also serve as habitat for endangered species and as passive open space to be enjoyed by the local communities. The combination of activities that these preserved spaces serve are integral to the success of these lands in the future.
