

MULTIPLE SPECIES HABITAT CONSERVATION PLAN

For further information
on the MSHCP please
see the **Multipurpose**

**Open Space Element of the
General Plan.**

The Wildlife Agencies include The
United States Fish and Wildlife
Service (USFWS) and the California
Department of Fish and Game
(CDFG).

Regional resource planning to protect individual species and habitats such as the Stephens Kangaroo Rat and Coastal Sage Scrub Habitat has occurred in Riverside County for many years. Privately owned reserves and publicly owned land have served as habitat for many different species. This method of land and wildlife preservation proved to be piecemeal and disjointed, resulting in islands of reserve land without corridors for species migration and access. To address these issues of wildlife health, and habitat sustainability, the Western Riverside County Multiple Species Habitat Conservation Program (MSHCP) has been developed. The MSHCP comprises a reserve system that encompasses core habitat, habitat linkages, and wildlife corridors outside of existing reserve areas and existing private and public reserve lands into a single comprehensive plan that can accommodate the needs of species and habitat in the present and future.

Western Riverside County MSHCP Program Description

The Endangered Species Act prohibits the "taking" of endangered species. Taking is defined as "to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect" listed species. "Harm" includes destruction of a listed species' habitat. The Wildlife Agencies have authority to regulate this "take." The intent of the MSHCP is for the Wildlife Agencies to grant a "take authorization" for otherwise lawful actions that may incidentally "take" or "harm" species or habitats outside of preserve areas, in exchange for supporting assembly of a coordinated reserve system. Therefore, the Western Riverside County MSHCP will allow the County to "take" plant and wildlife species within identified areas through the local land use planning process. The Wildlife Agencies have authority to regulate the "take" of threatened, endangered or otherwise sensitive species. In addition to the conservation and management duties assigned to the County and other agencies, a property-owner-initiated habitat evaluation and acquisition negotiation process has also been developed. This process applies to property which may be needed for inclusion in the MSHCP Reserve or subjected to other MSHCP criteria.
